Association

During the II Forum on Elite Sport, held in September 2001 at CAR Sant Cugat, Barcelona. It was commonly agreed by consensus that the fact of joint forces and share our experience must be a direct benefit for athletes and centres around the world.

At this point an steering group for a future International Association of High Performance Sports Training Centres started. From then, various meetings were taking place.

This group have at the present time representatives from Oceania, Africa, America, Asia and Europe, and it's open for new attendants of the five continents.

The main pour pose of this group was to establish the basis for the creation of an International Association of High Performance Sports Training Centres, in order to put in common, issues that will help on a better preparation of our athletes. With exchange opportunities, share of ideas and knowledge under a fair play philosophy.

After the success of the I Forum, held at Sidney on September 1999 and the II Forum, held at Barcelona on September 2001 -in which assistants could hear and share in interesting presentations and also could share the great motivation and enthusiasm of the organizers- is clear that we need to keep having a common place for the people and the organizations that work in the elite sports' field, in order to exchange experiences and information.

The Forum's philosophy is to provide a means of putting ideas in common and a place of discussion for all the people working in the elite sports' field. In this time in which globalization affect all aspects of our lifes, we need to find ways of enlarging the bonds between Centres devoted to elite sports and of involving all the people working in this activity.

The general aim of the Forum is to establish routes of communication and mutual collaboration between the different High Performance Centres around the world and the people and organizations interested in elite sports.

Modular content of past and future Forums, allowing to grow without Programming. Multilingual structure.
